ABOUT THE JMPR JUMP CUE

JMPR is built for quick, repeatable airtime. A painted maple core is carbon-reinforced using proprietary construction, then finished with a bold JMPR logo in your choice of red or blue. The handle wears a leather sport wrap for traction at elevation. Hardware uses Radial (3/8-8) threading for the main cue joints, while the extension connects via quick-release, so swapping setups is seconds-fast yet rock solid when assembled.

Dimensions are thoughtfully compact for control: total length about 47.25 inches, with a 29-inch shaft, 18.25-inch butt (or 12 inches without the extension), and a 7.25-inch extension. The slightly conical jump profile favors stiffness so more of your motion turns into clean lift and cue-ball speed, while the about 13.8 mm face keeps center-ball hits simple on tight bridges.

Extras you'll appreciate: All JFlowery cues ship from Jacksonville, Florida for North America and direct from the factory for international orders (typical transit: US ~4-5 days, International ~7-8 days).

DESIGN HIGHLIGHTS

Core & finish: Painted maple with carbon-reinforced proprietary construction and a bold JMPR overlay logo in red or blue—clean and high-contrast under clear.

Grip & control: Leather sport wrap for traction on dart-style mechanics and elevated strokes without over-squeezing the handle.

Jump format: Three-piece layout—Radial main joints for a solid assemble, plus a quick-release extension for near-table and longer-reach jumps.

Compact geometry: Total length about 47.25 inches; shaft 29 inches; butt 18.25 inches (or 12 inches without extension); extension 7.25 inches—purpose-built for tight clearances.

WHY CHOOSE THIS CUE

You want jumps that feel repeatable, not miraculous. JMPR's compact build, traction-forward wrap, Radial main joints, and fast quick-release extension help you set your bridge, aim clean, and clear the blocker with less effort—then land the cue ball where you planned.

POPULAR FAQS

Q: Red vs. Blue—any difference beyond color?

A: Purely aesthetic. Pick the color that frames the cue ball best in your room lighting and on your cloth.

Q: When should I remove the extension for a jump?

A: For very near obstacles and tight spaces, most players prefer the shorter butt (no extension) for a compact stroke; keep the full butt for longer-reach or higher-elevation jumps.

Q: Does the leather sport wrap change my technique?

A: Your mechanics stay the same—the wrap simply adds traction so you can accelerate without squeezing, which helps keep the stroke straight at elevation.

Pair your black/red JMPR jump cue seamlessly with the black/red BRKR break cue for a stylish battle-ready ensemble. Elevate your game with precision and flair! Discover versatility with our black/red JMPR, also available in a striking black/blue version. Choose the style that suits your taste!
