SMO-W SHAFT: A REVOLUTION IN CUE SPORTS

A NEW ERA FOR WOODEN SHAFTS

JFlowers Cues & Cases proudly presents the SMO-W (Wood) shaft – the most innovative and advanced wooden shaft the cue sports industry has ever seen. Following the runaway success of our SMO carbon fiber shaft, which quickly rose to #1 in pool, we are now redefining what's possible with wood.

TECHNOLOGY MEETS TRADITION

The SMO-W pro tapered shaft is crafted using the exact same groundbreaking technology and recipe that made the SMO carbon fiber shaft a market leader. At its core, literally and figuratively, lies a precision-engineered carbon fiber structure that guarantees performance , low deflection, consistency, enhanced feedback, and pinpoint accuracy. Wrapped around this core is a premium maple wood exterior, delivering the classic, organic feel that players love.

By combining the best of both worlds — the natural touch of wood with the uncompromising precision of carbon fiber — JFlowers has created a shaft unlike anything the market has ever seen.

CUSTOMIZABLE WEIGHT AND BALANCE

In another industry first, the SMO-W shaft features an adjustable weight system, allowing players to fine-tune the weight and balance point of the shaft to match your personal playing style. Whether you prefer a slightly front-heavy feel or a perfectly neutral balance, the SMO-W gives you full control. It's customization made simple, and performance made personal. 1 weight bolt (0.12oz) is already included and installed. You can purchase up to two more at 0.12oz each. Easy customization using a standard H3 Hex wrench/Allen key.

UNMATCHED PERFORMANCE AT A FAIR PRICE

At JFlowery, innovation has always been matched with a commitment to fair pricing. The SMO-W shaft delivers a low deflection premium performance and cutting-edge technology without the premium price tag often seen in the market. Our philosophy is simple: the best products should be accessible to all players, not just a select few.

THE FUTURE OF WOOD IS HERE

With the SMO-W, JFlowery Cues & Cases once again sets a new standard. We honor the rich tradition of wood, elevate it with modern technology, and offer it to the world with the quality and fairness our brand stands for. If you seek the warm feeling of wood paired with the elite-level precision and customization of modern engineering, look no further.

JFLOWERY + TAOM = TRUE

The SMO-Wood shaft by JFlowery now comes standard with the Taom Fusion tip – the ultimate choice for players demanding

the highest performance. By partnering with Taom, one of the most renowned names in cue tips, we ensure unparalleled precision, control, and durability with every shot. The Fusion tip perfectly complements the SMO-W's revolutionary design, enhancing its unique combination of natural wood feel and carbon fiber precision. This partnership reflects our commitment to delivering excellence and consistency throughout every part of your game. Experience true innovation, trusted quality, and elite performance – only with JFlowers and Taom.

Experience the future. Experience the SMO-W.
